1. Adopt a beach

This is a relatively new concept by which a person or a group of people “adopts” a beach area, becoming its guardian(s). It’s your turn! Choose a 100 m long beach area to monitor 4 times a year and observe how the situation changes. Please, enter the data in the Marine LitterWatch application, available on Google Play and AppStore.

2. 82% plastic

82% of litter that reaches Black Sea beaches consists of artificial polymer material (various types of plastic). Below, you will find a list of the most common plastic items that reach the Black Sea. Check if you can find them all!

Marine litter list: cigarette butt, packaging, small bag, lid, PET, plastic pieces, straw, cup, ear stick, foam, polystyrene, rope
